

Marquis Vineyard Watering Programme™

The Marquis Vineyard Watering Programme™ focuses on nurturing strong and healthy vines with balanced canopy growth to achieve the most intense fruit flavours possible. The amazing fruit flavour achieved in the vineyard is exactly what creates the Marquis Fruit Weight™ in the wine. Marquis Fruit Weight™ is the “velvet glove” sensation of fruit that sits on your tongue before the structure of the wine is exposed. The higher the Fruit Weight, the more intense and rich the flavours are in the finished wine.

Achieving a high Fruit Weight grade doesn't start in the winery; it starts in the vineyards.

We've always said “we ripen the vine, so that it can ripen the fruit”.

We're delighted that now every vineyard producing grapes for Mollydooker is using the Marquis Vineyard Watering Programme™.
